

Canon Scanner National Reseller Meeting

I returned this morning (around 1am) from New Orleans. I am so excited!!!

Canon had their first National Reseller Meeting and they introduced their newest scanner...the DR-X10C. WOW! It is an INCREDIBLE scanner. Scanning 8.5x11 in portrait gives you 100 pages per minute (that's 200 images per minute) at 100 OR 600 DPI and in B&W or COLOR!!! High quality scans without losing speed!

BUT WAIT...there's more...

Scan 8.5x11 in LANDSCAPE and you get 128 pages per minute...that's 256 images per minute!!! No matter what dpi selected! B&W or Color! That's FAST.

BUT WAIT...there's more...

This scanner has a 3-step dust prevention method! This scanner blows air across the glass, wipes the glass, and can move the entire image sensor to find a clear path on the scanner glass. How cool is that?

BUT WAIT...there's more...

- » 3 zone ultrasonic double feed sensors

- » Double Feed Retry mechanism

- » Dedicated sensor for doc size and angle detection

- » Staple Detection sensors

» Eject brake to help stack your documents

PLUS...there is even more! As you can tell, I'm very excited about this scanner! MSRP is \$17,995. Mention this blog and I'll give you \$1000 off PLUS you may be eligible for a \$1000 rebate. Call me today to find out more!!!
